Nivell 1

- Exercici 1

Programa **Anaconda** amb **Python 3** i **Jupiter Notebook** instalat.

- Exercici 2

sumar:

In [12]:
```
def sumar(x,y):
    return x+y
sumar(7,9)
```

Out[12]:
```
16
```

restar:

In [9]:
```
def restar(x,y):
    return x-y
restar(8,14)
```

Out[9]:
```
-6
```

multiplicar:

In [3]:
```
def multip(x,y):
    return x*y
multip(5,19)
```

Out[3]:
```
95
```

Dividir:

In [4]:
```
def multip(x,y):
    return x/y
multip(54,13)
```

Out[4]:
```
4.153846153846154
```

Modul:

In [5]:
```
def modul(x,y):
    return x%y
modul(6,19)
```

Out[5]:
```
6
```

- Exercici 3:

variant l'estil de lletra com demana l'exercici

llista ordenada:

1. item 1
2. item 2
3. item 3
    A. subitem 3.1
    B. subitem 3.2

Llista no ordenada:

- item 1
- item 2
- item 3
    - subitem
    - subitem

Nivell 2

- Exercici 1:

Exporta el **notebook** com a *pdf* i *html*

https://github.com/David-DataScience/Jupyter_Markdown/blob/main/Sprint_1.pdf

https://github.com/David-DataScience/Jupyter_Markdown/blob/main/Sprint_1.html

Nivell 3

- Exercici 1

Nbextensions al **Notebook** de **Jupyter** instalat!!
